RE: WITHDRAWAL OF A PROPOSAL TO REPEAL NOTICE NO. R 2054 OF 14 SEPTEMBER 1984 RELATING TO THE EXCLUSION OF CERTAIN FARM FEEDS FROM THE OPERATION OF CERTAIN PROVISIONS OF THE ACT.

The above matter refers.

The Registrar of the Fertilizers, Farm Feeds, Agricultural Remedies and Stock Remedies Act, 1947 (Act No. 36 of 1947), hereby gives notice of the withdrawal of the proposed repeal of Notice No. R. 2054 of 14 September 1984.

Notice No. R. 2054 of 14 September 1984 provides for the exclusion of all maize products from the operation of certain provisions of the Act, except for maize gluten and maize germ meal.

A proposal to manage the risk associated with hominy chop through repealing Notice No. R. 2054 of 14 September 1984 was published for public comment in the Government Gazette for public comment.

The Registrar considered all comments and representations received during public consultation process and it was determined that the current use of hominy chop does not present an unacceptable risk under prevailing conditions of use, and that existing industry quality assurance and risk management measures are in place to address potential risks associated with such use.

Having regard to all relevant considerations and being satisfied that it is reasonable and appropriate to do so, the Registrar has decided to withdraw the proposal to repeal Notice No. R. 2054 of 14 September 1984.

Trusting the above is in order.

MR M J MUDZUNGA
