## THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

### INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

### 1 PILLARS OF THE PROGRAMME

- 1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have a NIP obligation. This threshold of US\$ 10 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$10 million.
  - or
  - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$10 million.
  - or
  - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$10 million.
  - or
  - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.

- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

## **2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY**

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.

- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

## **3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)**

- 3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.

- 3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:

- Bid / contract number.
- Description of the goods, works or services.
- Date on which the contract was accepted.
- Name, address and contact details of the government institution.
- Value of the contract.
- Imported content of the contract, if possible.

- 3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at [Elias@thedti.gov.za](mailto:Elias@thedti.gov.za) for further details about the programme.

## **4 PROCESS TO SATISFY THE NIP OBLIGATION**

- 4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:
- a. the contractor and the DTI will determine the NIP obligation;
  - b. the contractor and the DTI will sign the NIP obligation agreement;

- c. the contractor will submit a performance guarantee to the DTI;
- d. the contractor will submit a business concept for consideration and approval by the DTI;
- e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
- f. the contractor will implement the business plans; and
- g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

### CERTIFICATE OF INDEPENDENT BID DETERMINATION

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

## TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO REVIEW AND FINALIZE NATIONAL LAND USE CLASSIFICATION WITHIN A PERIOD OF TEN (10) MONTHS

### 1. INTRODUCTION

- 1.1 The Department of Rural Development and Land Reform (DRDLR) requires the service of a firm/consortium to review and finalize the National Land Use Classification as part of the Norms and Standards development process.
- 1.2 The mandate of the Department of Rural Development and Land Reform in so far as spatial planning and land use management includes a responsibility to establish a spatial planning and land use management system that will provide for inclusive, developmental and equitable settlements patterns and optimum utilization of land and its resources.
- 1.3 The Spatial Planning and Land Use Management Act, Act 16 of 2013 (SPLUMA) in section 8 (1) requires the minister , after public consultation, to prescribe norms and standards for land use management and land development that are consistent with SPLUMA, the Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000), and the Intergovernmental Relations Framework Act. Furthermore, Section 8(2)(e) requires norms and standards to standardize the symbology of all maps and diagrams at an appropriate scale.
- 1.4 The following has been initiated in line with the National Land Use Classification process:
  - The brief background on the approach taken to initiate the Land use classification. This included the unpacking of the SPLUMA development principles
  - Mapping of South Africa land use classes and features, this covered the standardised land use classifications from both urban and rural land uses. The

## **TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO REVIEW AND FINALIZE NATIONAL LAND USE CLASSIFICATION WITHIN A PERIOD OF TEN (10) MONTHS**

primary land use classes, secondary land use classes and tertiary land use classes.

- The National Land use classifications also covered the definitions from both broad land use classes to secondary and tertiary land use classes.
- Lastly, the national land use classification briefly outlined the standard symbology will be required to be reviewed.

### **2. PROBLEM STATEMENT**

- 2.1 Both the SPLUMA and the National Development Plan requires the standardised taxonomy, symbology and definition for all land administration related matters. The National Land Use Classification will include a comprehensive list of unique land uses classes and features, definitions, symbology and a meta-language for land use classifications driven by sector group and aggregated to appropriate national feature classes.
- 2.2 The Republic of South Africa does not have a standard national land-use classification system which includes definitions and symbology. This has led to numerous incompatible and inconsistent land-use classes used across various spheres of government, local government in particular and other sectors/institutions with little uniformity. In order to ensure effective implementation of SPLUMA, the DRDLR requires to establish a uniform spatial planning system as well as to monitor compliance with the various requirements, including that of the development of land use scheme as stipulated in the SPLUMA
- 2.3 Municipalities are required to develop a single land use scheme for their area of jurisdiction. In order to monitor compliance, a framework/standardized land use classification system, methodology, and symbology are required to guide all 3 spheres of government to achieve uniformity, consistency, and compatibility when issues of land use and related matters are discussed/ communicated.
- 2.4 Furthermore, organs of state face various challenges with regard to the effective and efficient delivery of their spatial planning and land use objectives including but not limited to the following:

## **TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO REVIEW AND FINALIZE NATIONAL LAND USE CLASSIFICATION WITHIN A PERIOD OF TEN (10) MONTHS**

- Lack of coherent spatial planning and land use management policies, principles, norms and standards for spatial development planning and land use management;
- Lack of coordination of different land development processes resulting in duplication of procedures relevant to land development;
- Persistent spatial disparities and inconsistencies due to past spatial and regulatory imbalances;
- Inconsistencies and lack of uniformity in application procedures and decision-making structures for provincial and municipal authorities responsible for land use decisions and
- Lack of quality spatial data that provides baseline information on the status quo of various geographic areas.

### **3. PURPOSE AND OBJECTIVE OF THE PROJECT**

3.1 The main purpose of the project is to develop a national land use classification system/framework which will amongst others include the following objectives:

- (a) To facilitate uniformity in terms of spatial planning and land use management
- (b) To create an integrated uniform development planning system in South Africa
- (c) To create standardization (land use classes, definition and symbology) related to land use zones both in rural and urban areas.
- (d) To provide for a meta-language across all spheres of government and any other institutions.

3.2 The National Land use classification should include amongst other the following:

- (a) Broad land use classes and their definitions
- (b) Secondary and tertiary land use categories (including activities permissible under each category)
- (c) Symbology/notation, this will provide for standard symbology/notation for the main land uses, secondary land uses and tertiary uses.
- (d) Apart from the broad definitions, the NLUC to include all other classes of definitions as defined below:
  - Definitions on Institutional and legal aspects e.g. Municipal By-law etc.
  - Definitions on Technical Aspects such as FAR, Height, density coverage etc.

## TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO REVIEW AND FINALIZE NATIONAL LAND USE CLASSIFICATION WITHIN A PERIOD OF TEN (10) MONTHS

- Definition on categories of land uses/land aspects such as a shop, residential building etc.
- And any other definitions

### 4. SCOPE OF THE PROJECT

- 4.1 The significance of the NLUC is to guide all spheres of government in their spatial planning and land-use management processes to advance the country's land-use inventory and productivity in order to provide and support consistency in spatial development frameworks and land use schemes; thereby fostering a common, standardised language and reference-template for land-use management and spatial planning.
- 4.2 The NLUC is expected to facilitate consistent consolidation and reporting of land-use data and to provide the basis for the creation of a standardised national land use data set for South Africa. The data-set consists of:
- A list of unique land use classes and features
  - Definitions for land use classification terms
  - Common symbols for features (Unique IDs)
  - Basis and fundamentals of mapping
  - A meta-language for land-use classification (LUC) driven by sector group and aggregated to appropriate national feature classes.
- 4.3 The successful service provider will be required amongst others to undertake the following;
- A review of work to identify gaps and advise the department on the use of this body of work completed to date.
  - Identify key and logical coordination mechanisms that should be implemented to enable the harmonizing of land use management systems in South Africa.
  - Determine the approaches for integration of land use management, SDF's and land use mapping by the development and finalization of the NLUC framework.

## TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO REVIEW AND FINALIZE NATIONAL LAND USE CLASSIFICATION WITHIN A PERIOD OF TEN (10) MONTHS

- Consider the need for a land use meta-language (LUML) and key steps for its implementation, in reference to Land use definitions, Land use classification, Mapping methodology, symbology/notation and reporting

4.4 The following sections from the base work completed in phase 1, now require review, additions and consolidation; a wealth of information exists on this work and will be provided by the Department to the successful service provider:

### 4.4.1 The Land Use Classifications Review and Consolidation

- Classifications/land use classes are the main components of the framework and it is important to understand the perspective when looking at classification issues: why or what the classification or land use is required for? E.g. valuers are interested in zoning and not in land use
- Principles for classification should be developed.
- In order to ascertain the level of detail; broad land use categories must be developed from which classes can be derived, such as the secondary classes, and tertiary classes etc. or from broad categories to zones, then to more detailed zones
- Undeveloped categories must be debated further
- Land cover categories are limited and it must be kept in mind that these are easy to derive and land use are not so easy to derive and need to be verified
- A Two Prolonged Approach is required; bottom up or top down; both approaches are critical
- A differentiation between Rural and Urban land uses is required: e.g. KZN classification has rural land uses examples and urban land use language should not be forced and applied in rural land use environments

### 4.4.2 The Definitions Review and consolidation

- A set of definitions have been identified and now require consolidation to provide for a unique definition for the identified classes. These definitions should be verified for their legality.
- Must avoid ambiguity and must not be left to interpretation

## TERMS OF REFERENCE FOR THE APPOINTMENT OF A SERVICE PROVIDER TO REVIEW AND FINALIZE NATIONAL LAND USE CLASSIFICATION WITHIN A PERIOD OF TEN (10) MONTHS

- It is advised to use meta language to ease complexities
- Meta language allows for some degrees of flexibility
- Must align/consider International protocols that influence classification to which South Africa subscribe (e.g. bioregional planning).

### 4.4.3 The Symbology/Notation Review

- Pay attention to the development of a national symbology set, noting that at the various spheres of government, symbology sets have been developed and are in use.
- A set of guidelines will be required, building on the work already done
- Completion and alignment of definitions
- Completion of symbols especially 3rd class
- Development of symbols palette for major GIS Software's.
- Consideration must be given when using Black and white printing:
- Use of Unique ID for land use
- Colour coding using RGB model with values: e.g. KZN SA codes document
- Need to reconcile TMH 11 symbology for planners with cartographic rules

(a) The following must be taken into consideration:

- Symbology must be developed and be software independent
- Any effort must consider what is currently being used by cartographers and planners
- Keep in mind: black and white printing
- Symbology is scale dependent

4.5 Consultation: Develop a stakeholder engagement plan (Consultation Plan as part Inception report indicating how workshops, consultation and one on one engagements are expected to occur ) for the various consultation processes with various stakeholders, including government, private sector and any other stakeholders throughout the lifespan of the project. It is envisaged that the following meetings will be arranged for the duration of the project:

- i. Minimum of one workshop per in 9 provinces
  - ii. Minimum of 1 National Workshop ( Gauteng), the department will responsible for cost associated with logistics, invitations and venue bookings
- 4.6 The service provider may be required, with the assistance of the department, to establish Working Groups. The Working Groups should comprise of National Sector Departments, Provincial Departments, SOE, Municipalities, Academic Institutions, and all other relevant stakeholders to deal with specific issues, such as definitions, rural land use classes etc.

### 5. DELIVERABLES
