Weekly Price Watch: 20 September 2024

Directorate: Statistics & Economic Analysis

Sub-directorate: Economic Analysis

The price of maize decreased by 1,4% for white maize while increasing by 7% for yellow maize, while the US maize price increased by 6,2%. Local white maize increased due regional maize demand and global price increases on the back of a weaker dollar. The price of wheat decreased by 8,3% as a result of forecasts estimating a rise in wheat output compared to the previous estimates. The international wheat price increased by 2,3% as a result of crop losses in the European Union plus dry conditions in Ukraine and Russia. The price of soybeans decreased by 0,3% as forecasts indicated the outlook might be adjusted slightly upward. The international soybeans price increased by 1,8% due to hot dry weather in parts of the U.S amidst the increased crushing and biofuel production. The price of sunflower decreased by 0,3% .

Latest News Developments

The South African Reserve Bank's Monetary Policy Committee cut the interest rate by 25 basis points to 8% on the 19 September 2024 inline with consensus forecasts. The Monetary Policy stated that major central banks around the World have lowered rates but central banks are still moving carefully and policy stances remain relatively tight. The Monetary policy committee further stated that the output was marginally below their expectations for the first half of the year and they expect improvements in the second half, with growth of 0.6% in both quarters. This reflects rising confidence, in part due to a stable electricity supply. Also expected; is extra spending given withdrawals from the new Two-Pot retirement system, although some of these funds will be absorbed by debt repayments and tax. Core inflation trajectory is expected to be slightly below 4.5% over the medium term. A particular concern is investment, which has been contracting for four consecutive quarters.

The Agribusiness Confidence Index (ACI) has recovered by ten points to a level of 48 in the third quarter of the year after dropping to a 15-year low in the second quarter. The second quarter was uncertain as a result of South Africa's national elections, the formation of the Government of National Unity (GNU) seems to have eased that concern and returned the focus of survey respondents back to fundamental agricultural matters. Six of the ACI's ten subindices recorded improvements in the third quarter, including the turnover subindex which grew by 19 points to 50. Optimism stemmed primarily from firms operating in the winter crops and financial services segments. Meanwhile in the red meat and summer grains remain somewhat downbeat, reflecting the impact of the recent mid-summer drought and lingering animal diseases.

International Platform of Insects for Food and Feed second VP Antonine Hubert stated that Insect farming in Africa presents opportunity for sustainable food production. Insect farming is gaining recognition in sustainable food production, the sector has become the fastest-growing sustainable protein industry in the EU. EU insect-producing companies invested over €1.5-billion in insect farming and this is contributing to thousands of green jobs, proving its significance in the global economy. Dean Smorenburg CEO of Maltitol an agri-tech company based in Cape Town stated that insect farming in Africa presents an opportunity to create more sustainable food sources.

Agriculture science body the Agricultural Research Council will be representing Africa's scientific community at this year's Science Summit during the UN General Assembly. The theme for the Science Summit this year is "how science and innovation accelerate the achievement of the Sustainable Development Goals.
