1. INTRODUCTION

The primary objective of this study is to identify which products may have the potential to be exported by South Africa (SA) to Qatar. The secondary objective is to get an understanding of the Qatari environment, with a focus on trade.

2. COUNTRY FACTS²

Land Area: 1 707 756 km²

Climate: Summer, hot and humid; winter, mild with minimum rainfall

Population: 1 707 756 (end 2011)

Capital: Doha

Language: Arabic, English widely used

Type of Government: Emirate

Level of Economic Development: Developing Country

Currency: Qatari Riyal (pegged to the US \$ - US \$ 1 = QR 3.64)

Religion: the ultra-conservative Wahabbi interpretation of Islam, but culture and religion of Qatari's is relative moderate

3. HISTORICAL BACKGROUND³

Qatar became independent from the United Kingdom (UK) in 1971. The then emir, Sheikh Ahmed bin Ali al-Thani was overthrown by his cousin, Sheikh Khalifa bin Hamad al-Thani, who was in turn removed by his son Sheikh Hamad bin Khalifa al-Thani in a coup in 1995. Sheikh Hamad bin Khalifa al-Thani pursued a program of gradual political and economic reform, with the focus on developing the country's massive natural gas reserves. In June 2013 Sheikh Hamad officially handed power to his son Sheikh Tamim bin Hamad al-Thani.

Power in Qatar is concentrated in the hands of the emir, who governs with the assistance of a cabinet that is appointed by him. According to the new constitution of 2005 an Advisory Council should be created of which two thirds will be elected. The election was set to take place in 2013, but it was postponed. Enough safeguards are in place to assure that the emir will still direct government policy.

4. ECONOMIC OVERVIEW⁴

Qatar is the country in the world with the second highest GDP per capita.

The energy sector, particularly natural gas, remains the backbone of Qatar's output and trade. In 2012 about 88 % of Qatar's exports were derived from the mineral (energy) product sector. Exports have nearly tripled since 2007 due to strong oil and gas exports and relative high energy prices. This has led to a strong trade surplus in goods that has led to a positive balance of payments, except in 2011.

Qatar's economy is heavily reliant on state enterprises. A study that was done in 2009 indicates that the public and the mixed sector accounted for approximately 60% of GDP. Exports started to diversify slightly between 2006 and 2008 as non energy exports rose from 10% to 12%. Table 1 gives some economic indicators of Qatar.

| Unemployment rate (%) | 0.5 | 0.5 | 0.4 | 0.5 | 0.3 |
| Exchange rate (QR: us\$ (avg.)) | 3.64 | 3.64 | 3.64 | 3.64 | 3.64 |
| Trade balance (US\$ m) | 25 555 | 53 873 | 87 373 | 102 181 | 91 571 |
| Total external debt (% of GDP) | 82.3 | 97.3 | 77.7 | 72.3 | 74.1 |

a) Actual

b) Economist Intelligence Unit Estimates

Graph 1 indicates that oil and gas is the biggest sector (57.8%) of Qatar's GDP, while the agriculture and fishing sector is only 0.1% of GDP.

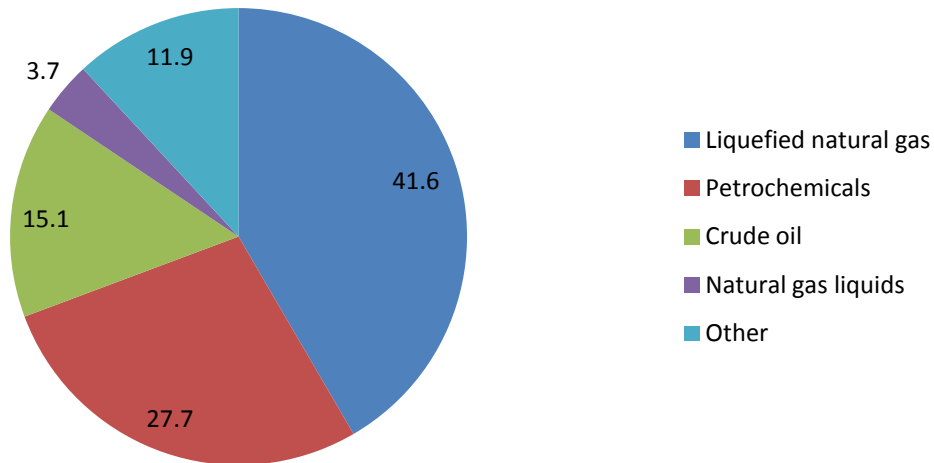

Graph 1: Composition of GDP by sector at current prices (2012)⁵

Neither nationals nor expatriates are subject to personal taxation. Firms from outside the Gulf Co-operation Council (GCC) are required to pay corporate tax at a flat rate of 10%. Profits in the hydrocarbons sector are taxed differently, and are based on the share of the foreign company in the project and on the level of capital investment.

Graph 2 and 3 indicate the composition of Qatari exports and imports in 2012. It is noted that food exports were so small it is indicated under other, while food imports were 6.7% of total imports.

The Human Development Index (HDI) is a measure used by the UN to measure health, education and wealth (decent standard of living). The HDI is the creation of a single statistic that serves as reference for both social and economic development. The HDI is rated between 0 and 1, where 1 is the maximum and 0 the minimum.

| Qatar | 0.834 | Saudi Arabia | 0.782 |
| UAE | 0.818 | South Africa | 0.629 |

5. INFRASTRUCTURE^{10 11 12 13}

The Qatari Government has been investing aggressively in transportation infrastructure and the sector grew significantly between 2007 and 2012. It is anticipated that building and construction will improve over the next few years as Qatar is going to host the 2022 FIFA World Cup.

Currently four main ports are in operation for maritime transport, and one small one mainly for fishing. Two of the main ports are undergoing upgrades and expansion, which will continue for a few years into the future.

Infrastructure for air transport is also undergoing extensive expansion with the new Doha/Hamad International Airport. This project has been running for a few years already and is in the final stage of completion. There are also ambitious plans for rail transport, and a number of projects are still in the planning phase.

The main means of transporting freight and passengers across Qatar are the road network. Population expansion, economic growth and the FIFA World Cup of 2022 are the major factors that are leading to the quick development of the road network. The authorities are well aware of the limitations of the current road infrastructure.

Some of the big projects include the Doha Expressway (construction of new roads, as well as the addition of new lanes that will cover thousands of kilometers), the Dukham Highway – Eastern section, the Lusail Expressway and the Orbital Highway. These projects are in the construction or planning phase, and are built to accommodate the estimated half a million visitors to the World Cup.

6. RISK PROFILE¹⁴

Table 4 indicates the risk profile of Qatar. The definition of each type of risk is given in annex 1.

¹⁴ Country Risk Service Qatar April 2014. www.eiu.com Economist Intelligence Unit Ltd 2014

Sovereign risk

The rating is supported by fiscal and external surpluses. Qatar has a strong capability to meet its debt obligations.

Currency risk

The Qatari Riyal will stay pegged to the US \$ and a revaluation is not expected in 2014/15.

Banking sector risk

The banking sector is well capitalised, Qatar has one of the lowest non performing loan ratios in the region and the banking sector is subject to tight regulations by the Central Bank.

Political risk

Qatar is expected to remain stable in 2014-15 and is relatively detached from the anti-government protests that have periodically affected the region since 2011. Possible threats to political stability stem from tension with neighbouring Gulf Co-operation Council states, which have hinted at the possibility of imposing sanctions on the country.

Economic structure risk

Hydrocarbon exports will remain the primary contributor to the GDP, thus the fiscal and external accounts are vulnerable to fluctuations in oil and gas prices.

Country risk

The overall country risk is a score of an A.

Table 4: Qatar: Risk Profile¹⁵

| | Sovereign risk | Currency risk | Banking sector risk | Political risk | Economic structure risk | Country risk |
|--------------|-----------------------|----------------------|----------------------------|-----------------------|--------------------------------|---------------------|
| January 2014 | AA | A | BBB | BBB | A | A |

7. BILATERAL, REGIONAL & MULTILATERAL AGREEMENTS¹⁶

The Most Favorite Nation (MFN) trade dominates Qatari imports and exports as can be seen in graph 4.

Qatar is a member of the Gulf-Cooperation Council (GCC) Customs Union that comprises the neighboring gulf states of Bahrain, Kuwait, Oman, the Kingdom of Saudi Arabia, and the United Arab Emirates (UAE). The GCC began implementation towards a customs union in 2003, but work on full integration is still ongoing. The major elements of the union include a Common External Tariff (CET) and common model laws on customs and trade remedies. The respective customs administrations of GCC members retain their autonomy and there is no integration of their functions at present. The UAE and Saudi Arabia in a lesser manner are the major trading partners of Qatar in the GCC.

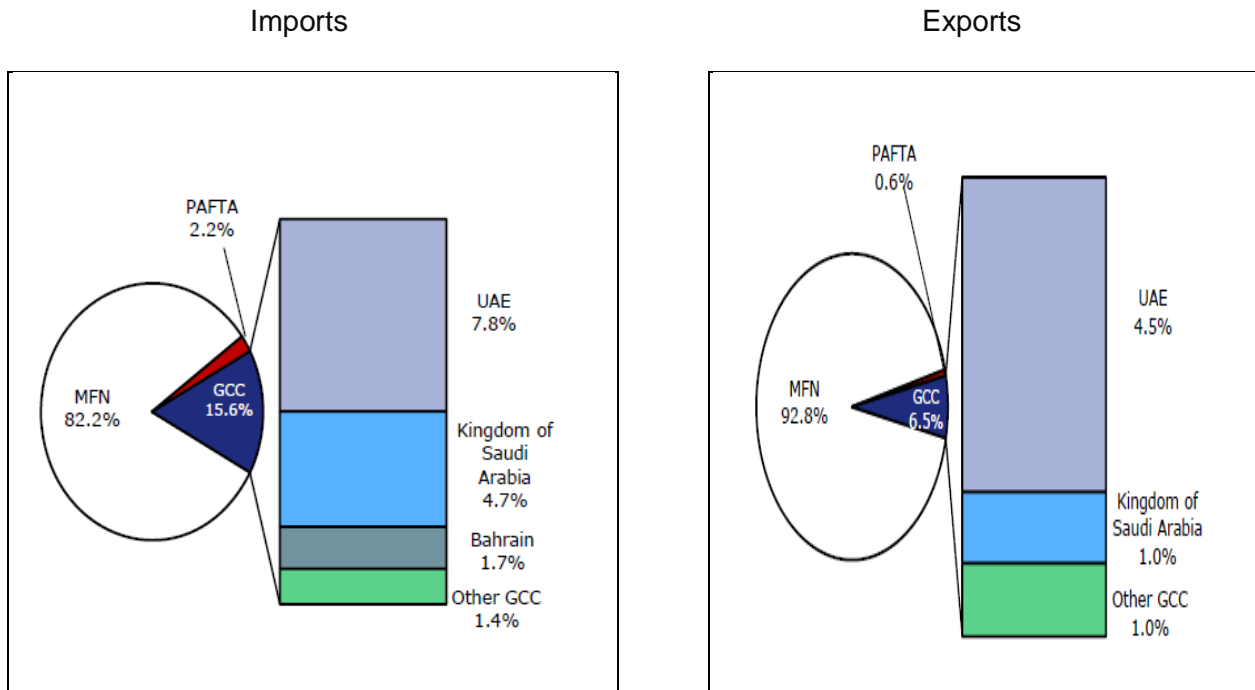

¹⁵ The ratings are measured on a scale of 0-100. Higher scores indicate a higher level of risk. The scale is divided into ten overlapping bands: AAA, AA, A, BBB, BB, B, CCC, CC, C, D. For a more detailed explanation of the ratings, please go to www.eiu.com/regulatoryaffairs.

¹⁶ Trade Policy Review: WTO. Report by the Secretariat - March 2014

The GCC has negotiated two free trade agreements, one with Singapore and the other with EFTA countries. The agreement with EFTA countries is however halted till an impact study has been completed.

Qatar is also a member of the Pan-Arab Free Trade Area (PAFTA) that entered into force in 1998. It provides for the facilitation and development of inter-Arab trade in goods. A separate agreement on the trade in services is currently under negotiation.

Qatar does not grant unilateral preferences to any country, but received unilateral access for its exports under the GSP schemes of Canada, the EU¹⁷, Turkey and the Customs Union comprising of Belarus, Kazakhstan and Russia.

Graph 4: Overview of reciprocal trade in 2012

Qatar has 22 bilateral investment agreements with a number of trading partners, some of which have not been ratified, in order to provide a framework and facilitate investment (table 5).

¹⁷ Qatar was a GSP eligible country of the EU until January 2014

Table 5: Bilateral investment agreements

| Partner | Date of signature | Entry into force |

Qatar is a member of the World Trade Organization.

8. AGRICULTURAL, FORESTRY AND FISHERIES PROFILE^{18 19}

The scarcity of fertile land and water (a major part is desert) imposes severe limitations on agriculture production, and a large proportion of Qatar's food must be imported. According to the Food and Agriculture Organisation of the United Nations (FAO), only about 1% of Qatar's total land of 11 590km² is arable. In 2012 agriculture and fisheries have represented only 0.1% of the Qatari GDP. The agricultural part of Qatar's sovereign wealth fund (Hassad Foods) has bought land in Sudan and Australia. Plans were also announced to spend hundreds of millions of dollars on agricultural projects in other countries (Kenya, Brazil, Argentina, Turkey and Ukraine). The Qatari ambassador in Zimbabwe has also indicated that bilateral agreements on agriculture will soon be signed between the two countries.²⁰ The Qatari Government maintains a fishing fleet and since the late 1990 has placed more weight on commercial fishing. The use of treated sewage effluent and desalinated water for irrigation has helped to expand the production of some fruit (dates and melons) and vegetables (tomatoes, squash and eggplant).

Qatar imports about 90% of its food requirements.

9. TRADE & TARIFF POLICIES²⁴

Qatar has promoted an open trade policy in recent years, to help with the diversification away from an economy heavily dependent on energy exports. There are no sector specific trade policies although the government has indicated broad plans to encourage investment and development outside the oil and gas sector.

The General Administration of Customs of Qatar is responsible for the entry/exit of goods and falls under the Ministry of Economy and Finance.

Trade policy plays a key role in guaranteeing food security in Qatar. Most of the strategic reserves of agricultural products kept in the country are accumulated through imports before they are sold in the market through the Central Tender Committee. Qatar maintains strategic food reserves for wheat, rice, sugar, oil,

²³ Trade Map

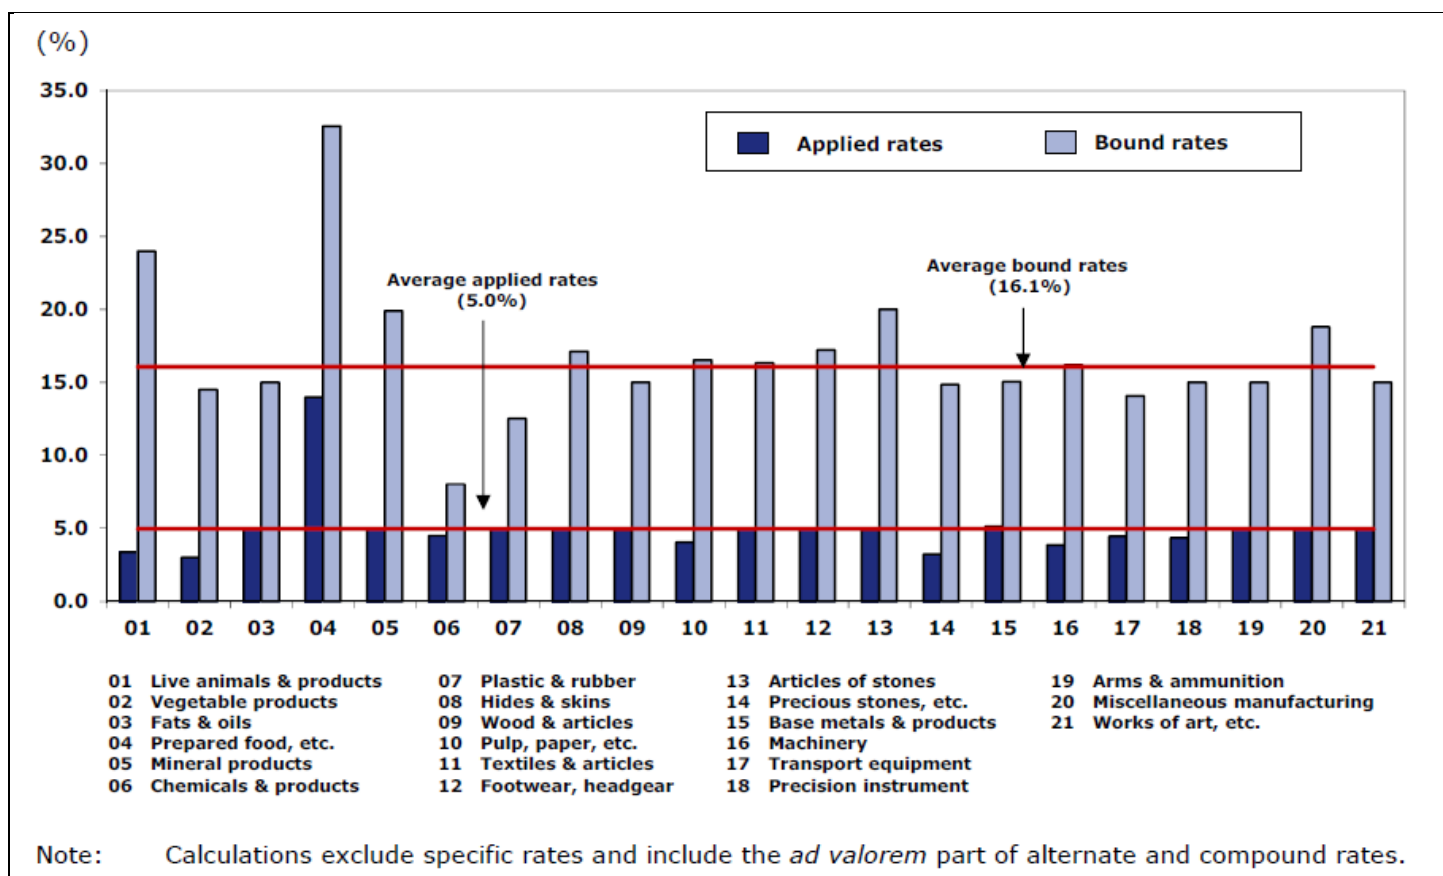

²⁴ Trade Policy Review: WTO. Report by the Secretariat - March 2014

milk, and barley, to ensure there are no supply shortages. The production of some of these products is supported by public subsidies. Products are distributed through standard market channels. These food reserves operate under government protocols that, in practice, function on a first in-first out basis²⁵.

Graph 5 indicates that the average applied tariff on HS 4 products level (prepared foods, etc) are more than double of that of other HS products. Agricultural tariffs averaged plus-minus three percentage points higher than industrial product tariffs (7.1% vs. 4.6% in 2013).

The majority of tariffs are 5% but 20 tobacco product lines are at a tariff peak. Some agricultural products are traded duty free.

Graph 5: Average applied and bound tariffs by HS section in 2013

10. AGRICULTURAL, FORESTRY AND FISHERIES TRADE STRUCTURE AND PRODUCT ANALYSIS BETWEEN SA AND QATAR

There is a Commercial and Technical Cooperation (ECTC) Agreement between Qatar and SA that was signed in 2002. This agreement makes provision for a Joint Commission on Economic, Commercial and Technical Cooperation to be set up.

Table 7 indicate the export of agricultural, forestry and fisheries products with a value of R 1 million or more by SA to Qatar. It is noted that citrus (HS 080510 and HS 080550), Fresh Grapes (HS 080610), Sauces and Preparations (HS 210390) and Sugar confectionary (HS 170490) were under the top five average exports for the period 2010 to 2013.

²⁵ Trade Policy Review: WTO. Report by Qatar - March 2014

11. AGRICULTURAL MARKETS ACCESSIBILITY²⁸

In general Qatar encourages open trade. Special import procedures are applicable to 50 tariff lines. Meat and lard of swine, alcohol, chocolate containing alcohol, and hides and other items of swine are included here.

Strategic reserves of agricultural products kept in the country are accumulated through imports before they are sold into the market through the Central Tender Committee. Imports of food will increase because of the rise in population in Qatar.

12. TRADE POTENTIAL ANALYSIS²⁹

The trade potential analysis is done via the trade potential index (TPI) and the "trade chilling concept". The TPI concentrates on products that are already traded between countries (trade deepening), while "trade chilling" concentrates on products that are not currently traded between countries, but have the potential to be traded (trade widening). Point 12.1 discusses the TPI and point 12.2 the "trade chilling concept".

It is important to understand the TPI and the "trade chilling" concepts. Note that they only indicate what products can be exported under certain criteria as described in the methods used. For example, if it is indicated that SA can export a product to the other country, but SA doesn't export the product, because it doesn't produce enough of the product or because of phyto-sanitary reasons that prohibit the import of the product by the other country from SA, and must be taken into consideration.

12.1 Trade potential index (TPI)³⁰

The Trade Potential Index uses a scoring system based on data obtained from the Trade Map database to determine which products have the potential to be exported to a country. The trade indicators contained in

²⁷ WTA – Revised data

²⁸ Trade Policy Review Summary. WT/TPR/S/296 • Qatar

²⁹ Imports and exports by Qatar to/from the world were only available for 2010 to 2012. The indicative trade potential was thus only available for 2010 to 2012. Exports and imports by SA were for the period 2009 – 2013.

³⁰ Trade Map - www.trademap.org

the database used were: Did Qatar import from SA; is the exports by SA to Qatar growing; is SA exports to the world growing; is Qatar's imports from the world growing; and is the avg. indicative trade potential³¹ larger than R 1 million. The TPI concentrates on products that are already traded between countries (trade deepening). The TPI is measured against a potential score of 5. A score of 0 would represent the lowest end of the scale and the least trade potential whilst a score of 5 would indicate the greatest trade potential.

Table 9 indicate the products that have the maximum TPI score of 5 and an average indicative trade potential of more than R12.8 million. The top products for potential exports are: chocolates (HS 180690), sweet biscuits (HS 190531), communion wafers ((HS 190590), fresh apples (HS 080810) and sauces & preparations (HS 210390). It is important to note that only the top products for potential exports are indicated in table 9. There could be more products if one looks at the TPI list in the annex.

Annex 3 gives a more comprehensive description of the TPI. Annex 4 gives the TPI of more products that may have the potential to be traded between SA and Qatar.

³¹ The indicative trade potential is defined as the lower of the value a selected country exports to the world or the value the partner country imports from the world minus the current trade between the two countries under review. The trade potential is indicative only and serves as a departure point for further research. It gives an overview of the complementarities

Table 9: The Trade Potential Index (TPI) and the Indicative Trade (ITP)³² of agricultural/forestry/fisheries products traded between SA and Qatar (Array is based on Total TPI score, followed by the avg. ITP).

| HS Code | Description | Avg. ITP/year 2010 – 2012 (R'000) | Total TPI Score | Did Qatar import from SA ^{33 *} | Is the exports by SA to Qatar growing | Is SA exports to the world growing | Is Qatar's import from the world growing? | Is the avg. indicative potential trade larger than R 1 million? |

³² The indicative trade potential is defined as the lower of the value a selected country exports to the world or the value the partner country imports from the world minus the current trade between the two countries under review. The trade potential is indicative only and serves as a departure point for further research. It gives an overview of the complementarities of the two economies.

³³ If trade was more than R10 000 it is assumed that trade has taken place

12.2 "Trade chilling concept"

The Trade chilling concept is a method used to indicate which products have the highest potential to be traded between countries, if current trade flows are excluded (There is no trade in the products between the countries). Because current trade flows are excluded, this refers to trade widening, rather than to trade deepening as in the TPI.

The trade chilling concept refers to products which Qatar and South Africa are trading with the rest of the world, but not with each other. The trade chilling took the following into consideration: (i) average global exports from South Africa between 2009 and 2013 and (ii) global average imports into Qatar between 2010 and 2012 (iii) where the average product trade between Qatar and South Africa were R6 000 or less between 2009 and 2013, no trade is assumed.

Table 10 indicate the trade chilling of exports by SA with a value of more than R100 million to the world and imports by Qatar with a value of more than R50 million from the world. The products identified here are: rice (HS 100630), fowls (HS 020714), doors and their frames (HS 441820), waters (HS 220210), onions and shallots (HS 070310), newsprint (HS 480100) and ice cream (HS 210500).

The complete trade chilling table is in annex 5. **Once more it is important not only to look at the table with limited tariff lines, but rather to look at the annex that shows trade chilling in more detail.**

Table 10: Trade chilling of agricultural/forestry and fisheries products traded between South Africa and Qatar (R'000) (Only products with an export value of more than R100 million by SA to the world and an import value greater than R50 million by Qatar from the world were taken into consideration).^{34 35}

| HS code | Description | SA Exports to Qatar AVG Value 09-13 ³⁶ | Qatari imports from world Avg. 3 years | SA exports to world Avg. 5 years |
|---------|--|---|--|----------------------------------|
| '100630 | Rice, semi-milled or wholly milled, whether or not polished or glazed | 0 | 920 707 | 132 431 |
| '020714 | Fowls (gallus domesticus), cuts & offal, frozen | 0 | 343 166 | 164 637 |
| '441820 | Doors and their frames and thresholds, of wood | 0 | 134 793 | 189 217 |
| '220210 | Waters incl mineral&aeratd,containg sugar o sweeteng matter o flavourd | 3 | 131 899 | 379 638 |
| '070310 | Onions and shallots, fresh or chilled | 0 | 79 866 | 135 849 |
| '480100 | Newsprint, in rolls or sheets | 0 | 57 739 | 287 108 |
| '210500 | Ice cream and other edible ice, whether or not containing cocoa | 0 | 55 394 | 148 005 |

³⁴ Trade Map as adapted

³⁵ The trade chilling took the following into consideration: (i) average global exports from South Africa between 2009 and 2013 and (ii) global average imports into Qatar between 2010 and 2012 (iii) where the average product trade between Qatar and South Africa were R6 000 or less per annum between 2009 and 2013, no trade is assumed

³⁶ If average trade between SA and Qatar was R6 000 or less, it is assumed that no trade has taken place

13. CONCLUSION

The objective of understanding the Qatari environment, with a focus on trade was discussed under the following points: country facts of Qatar, historical background and economic overview, infrastructure of the country, Qatar's risk profile and Qatar's trade agreements. This was followed by a discussion of agricultural, forestry and fisheries profile, trade and tariff policies, trade structure & product analysis, and market accessibility.

The primary objective of the study was to identify which products may have the potential to be exported by SA to Qatar. The following were used to identify potential exports: a & b) Current trade (with the world and with SA), c & d) the Trade Potential Index and Trade Chilling.

The top five agricultural/forestry/fisheries products identified according to the techniques mentioned are:

- a) Qatari imports from the world – rice (HS 100630), sheep (HS 010410), fowls (HS020712), cigarettes (HS 240220) and non-alcoholic beverages (HS220290).
- b) SA exports to Qatar: citrus (HS 080510 and HS 080550), Fresh Grapes (HS 080610), Sauces and Preparations (HS 210390) and Sugar confectionary (HS 170490)
- c) Products with an export potential according to the TPI: chocolates (HS 180690), sweet biscuits (HS 190531), communion wafers ((HS 190590), fresh apples (HS 080810) and sauces & preparations (HS 210390).
- d) Products with an export potential according to trade chilling: rice (HS 100630), fowls (HS 020714), doors and their frames (HS 441820), waters (HS 220210) onions & shallots (HS 070310), newsprint (HS 480100) and ice cream (HS 210500).

Although these products are identified for potential exports, **it is important to note that there are many more products that could be identified** (these products here have been identified for summary purposes). Look at the techniques used and identify if the tariff line of your product is included in the tables or annexes. From this you will be able to identify which products may have the potential to be exported to Qatar.

Although the Qatari population is relatively small, it imports 90% of its food products. It has a relative open trade policy and is the country with the second highest per capita income in the world. The EU, Gulf countries and the USA, have together accounted for more than half of the total imports of Qatar for 2012. Exports by SA to Qatar are thus a definite possibility, especially with counter seasonal agricultural products.

ANNEXES

Annex 1: Definitions of different types of risk³⁷

Definitions:

Sovereign risk

This risk category assesses the risk that the sovereign or an entity guaranteed by the sovereign defaults on its debts. Sovereign default is defined as a build-up in arrears of principal and/or interest on foreign- and/or local-currency debt owed by a government or a government-guaranteed entity. The sovereign risk rating is informed by scores for a combination of political, policy, cyclical and structural variables.

Currency risk

This risk category measures the risk of a devaluation against the reference currency (usually the US dollar, occasionally the euro) of 25% or more in nominal terms over the next 12-month period. The currency risk rating is informed by scores for a combination of political, policy, cyclical and structural variables.

Banking sector risk

This risk category gauges the risk of a systemic crisis whereby bank(s) holding 10% or more of total bank assets become insolvent and unable to discharge their obligations to depositors and/or creditors. A banking crisis is deemed to occur even if governments restore solvency through large bail-outs and/or nationalisation. A run on banks facing a temporary lack of liquidity rather than underlying solvency problems is not deemed to constitute a crisis, provided that public confidence in the banking system is quickly restored. Banking crises are typically associated with payment difficulties in the corporate or household sectors; bursting of asset price bubbles; currency and/or maturity mismatches. The rating can therefore serve as a proxy for the risk of a systemic crisis in the private sector. The banking sector risk rating is informed by scores for a combination of political, policy, cyclical and structural variables.

Political risk

This risk category evaluates a range of political factors relating to political stability and effectiveness that could affect a country's ability and/or commitment to service its debt obligations and/or cause turbulence in the foreign exchange market. The political risk rating informs the ratings for sovereign risk, currency risk and banking sector risk.

Economic structure risk

This risk category is derived from a series of macroeconomic variables of a structural rather than a cyclical nature. Consequently, the rating for economic structure risk will tend to be relatively stable, evolving in line with structural changes in the economy. The economic structure risk rating informs the ratings for sovereign risk, currency risk and banking sector risk.

Overall country risk

This risk rating is derived by taking a simple average of the scores for sovereign risk, currency risk and banking sector risk.

Annex 3: Description of the Trade Potential Index ³⁹

It is important to note what criteria are used. The products identified for potential exports are based on the criteria used.

The Trade Potential Index uses a scoring system based on data obtained from the Trade Map database. This allows the analysis to focus on trade potential whilst taking cognizance of import demand, import trends, growth rates and unit values rather than focusing solely on trade potential values. A score of either 1 or 0 is assigned to five of the trade indicators contained in the database. This score is then aggregated to give a total score, which is measured against a final score of 5. A score of 0 would therefore represent the lowest end of the scale and the least trade potential whilst a score of 5 would indicate the greatest trade potential.

The criteria for scoring are as follows:

- The value of imports from a country: If trade in the form of average exports by SA to Qatar did exist between 2009 and 2013, and the value was more than R10 000, a score of 1 is allocated. The absence of trade (or trade less than R10 000) is allocated a score of 0. The existence of a trade relationship is deemed a significant factor in furthering trade.
- Growth in export demand: If the exports from SA to Qatar have registered a positive growth measured over the five year period from 2009 to 2013, a score of 1 is allocated. No growth or negative growth rates are awarded a score of 0.

³⁹ As adapted. Trade Potential Between South Africa and Nigeria. Directorate International Trade: Trade Research Desk, Department of Agriculture, Pretoria. 1 November 2005. Yusuf Daya, Editor: Ezra Steenkamp

- Growth in import demand: If imports by Qatar from the rest of the world have registered a positive growth measured over the three year period from 2010 to 2012, a score of 1 is allocated. No growth or negative growth rates are awarded a score of 0.
- Export growth: Growth of exports from SA to the rest of the world is indicative of supply capacity, and increased demand for locally produced goods. A positive growth rate in the value of exports over a five year period from 2009 to 2013 is awarded a score of 1, whilst no or negative growth is awarded a score of 0.
- Indicative Trade Potential: Indicative trade potential isolates total demand and total export capacity thereby providing a rough estimate of how much countries could 'theoretically' trade between them. A positive 'indicative trade potential' suggests that a trade opportunity exists. A threshold value of an average amount of R1 million for the period between 2010 and 2012, is set for the allocation of a score of 1. Trade potential with a lower value or with no or negative trade potential values are allocated a score of 0

Annex 4: The Trade Potential Index (TPI) and the Indicative Trade Trade (ITP)⁴⁰ of agricultural/forestry/fisheries products traded between SA and Qatar (Array is based on Total TPI score, followed by the avg. ITP)

| HS Code | Description | Avg ITP/year 2010 – 2012 (R'000) | Total TPI Score | Did Qatar import from SA ⁴¹ | Is the exports by SA to Qatar growing | Is SA exports to the world growing | Is Qatar's imports from the world growing? | Is the avg. indicative potential trade larger than R 1 million? |

40 The indicative trade potential is defined as the lower of the value a selected country exports to the world or the value the partner country imports from the world minus the current trade between the two countries under review. The trade potential is indicative only and serves as a departure point for further research. It gives an overview of the complementarities of the two economies. If the ITP was less than R1 000 000, it is excluded from the table.

41 If trade was more than R10 000 it is assumed that trade has taken place

⁴² Trade Map as addapted

⁴³ The trade chilling took the following into consideration: (i) average global exports from South Africa between 2009 and 2013 and (ii) global average imports into Qatar between 2010 and 2012 (iii) where the average product trade between Qatar and South Africa were less than R6 000/annum between 2010 and 2012, no trade is assumed

⁴⁴ If average trade between SA and Qatar was R6 000 or less, it is assumed that no trade has taken place
