

# **FOREST RESTORATION PROGRAMME TABLE MOUNTAIN NATIONAL PARK**

M Mthethwa  
Table Mountain National Park, SANPARKS, Cape Town

## **Abstract**

The Forest Rehabilitation Programme is an initiative between SANParks, DEAT, SANBI, LOTTO and SAPPI, that is focussing on rehabilitation of the forest pockets of the Peninsula and alleviating pressure on the medicinal plant resources. The programme provides alternative resources through propagation and cultivation ventures with traditional healers and Rastafarians. Thus it aims to protect indigenous biodiversity of the Afro-montane forest species in the Table Mountain National Park.

This programme consists of three projects, which are currently active. The presentation focussed mainly on the link between these projects and a brief discussion of the progress.
