Weekly Price Watch: 06 December 2019

Directorate: Statistics & Economic Analysis

The price of local white and yellow maize decreased by 4.2% and 1.5% respectively, whilst the US price increased by a percentage point. The widespread rainfall locally initiated the price declines. The rise in the US price is due to inter-alia, a rise in ethanol production in the country. The price of local wheat decreased by 0.2% this week mainly due to a stronger rand while the US wheat price increased by 3.4% as a result of production concerns in certain parts in the US, Western Europe, Australia, and the dryness in Argentina. The price of local sunflower and soybeans increased by 3.4% and 0.9% respectively this week. The price of US soybeans decreased by 1.3% as a result of favourable weather conditions in Brazil and parts of Argentina and the uncertain trade deal between US and China. The price of sorghum remains unchanged compared to last week..
